- Angular, React
- NgRx, Redux
- Javascript, TypeScript
- HTML, Sass
- Node.js, Express
- GCP Firebase

## PROJECTS

### **mathangs.com**

A practical list app

A data-driven project that uses Redux pattern to centralize client-side state, interacts with a real-time NoSQL database and authenticates users using Google OAuth and email/password

### **andregao.com**

A personal website

Built with Angular Material and Flex-layout. A front end focused project that implements modern Web APIs, CSS Flexbox, responsive design, and explores the view mechanics in Angular

## EXPERIENCE

### **Intern Web Developer**

**Indieparty Co.** — Las Vegas, NV 2018

Reviewed code base and technical documentation, studied best practices from the development team and learned from tech lead on how to scale a production Angular application

### **VP of Sourcing, IT Ops**

**OrderWithMe Inc. WithMe Inc.** — Hangzhou, China & Las Vegas, NV  
2011-2017

Led a sourcing team in China that brought product ideas from concept to mass production for the American market. Supervised manufacturing lifecycles from samples to quality control and logistics. Managed several private label programs and supply chain operations across a variety of industries. Developed and set up IT infrastructure for our HQ and retail stores

### **Technical Director**

**Nihaoareyou Inc.** — Shanghai, China 2009-2011

Managed post-production team and operations, recruited and coached crew and editors, in charge of creating visual effects and oversaw english translations for all web content

### **Technical Manager**

**Shangby Inc.** — Shanghai, China 2008

Managed crew and pre-production, led live broadcast shopping events, created newsletters, maintained e-commerce site and affiliated marketing program
